<i>Contact information</i>		
Surname:	Arai	
Given Name:	Yumiko	
Government (if applicable):		
Organization (if applicable):	Japan Oil, Gas and Metals National Corporation (JOGMEC)	
Country:	Japan	
E-mail:	isa-jogmec@jogmec.go.jp	
<i>General Comments</i>		
<p>We generally agree with the draft. It is understood that the methods described in the draft have been commonly used in various fields. It mentions the need to consider the methods taking into account the factors regarding culture, politics, law, regulation and economy. In addition, “hazard” in the draft covers natural environment/ecosystem issues, pollution and hazardous substance issues, occupational issues, climatic and natural events, and socioeconomic issues. Although the evaluation of these issues requires not only technical evaluation but also a wide range of knowledge, these items should be included in the guidelines for mining areas in the Area.</p>
