
8-9 October 2020, Jamaica Conference Center, Kingston, Jamaica

- Comparative analysis of the financial aspects of seabed mining and land-based mining
  - Webinars on 9, 11 and 12 June 2020

A series of informal webinars was organized with a view to providing information on the methodology to be used in the preparation of the comparative analysis of the financial aspects of seabed mining and land-based mining and for the consultants to receive feedback from participants with respect to such methodology. It is recalled that this analysis was requested by the ISA Council at its February 2020 meetings.

Two consultants were contracted by the secretariat, namely, RMG Consulting and CRU International Ltd., to prepare the study. During the webinars they presented a description of the methodology to be used in the preparation of the study which remains a work in progress. The study will be made available on the ISA website before the next meeting of the OEWG.

During those webinars, the following presentations were made.

- PPT by RMG Consulting
- PPT by CRU International Ltd
