

Regulation 46ter - Environmental monitoring delivered 22 July 2022

Thank you Madame Facilitator.

The Deep Ocean Stewardship Initiative is in agreement with the changes made to 46ter. DOSI supports the recommendation of France to include in Para 3 the language of the FAIR Guiding Principles - findable, accessible, interoperable, and reusable - to the quality of the data a Contractor should release. DOSI also supports the recommendation of Federated States of Micronesia and others that real-time data release is desirable and could be considered in Para 3. Thank you.
