<i>General Comments</i>		
<ul style="list-style-type: none"> • We would like to express our deep gratitude for such tremendous efforts made by the Legal Technical Commission members and the ISA Secretariat for the development of standards and guidelines required to be established in parallel with development of exploitation regulations. • The guidelines may need restructuring. It states that this “guideline is structured into five sections” in B. Format of this Guideline, I. Introduction of the guidelines. However, it is structured with Sections I – VI and there is no consistency with chapter and section numbers mentioned in the document.
