

**Meeting of the Council of the International Seabed Authority  
27<sup>th</sup> Session, Part II (July 2022) – Informal working group (Environmental)**

**Intervention by the IUCN (22 July 2022, Afternoon Session)**

**Draft Regulation DR46ter. Environmental monitoring**

Thank you, Madam Facilitator,

IUCN takes the floor very briefly to support the intervention by France on DR46ter, paragraph 3. Here, we strongly recommend the incorporation of FAIR principles (which are findable, accessible, interoperable, and reusable), and likewise, also the inclusion of the CARE Principles for Indigenous Data Governance (which are collective benefit, authority to control, responsibilities, and ethics).

Thank you.
