<i>General Comments</i>		
All information from texts referenced by the draft, which is essential and which has additional value, should be provided for in Guidelines.		
<i>Specific Comments</i>		
Page	Line	Comment
1	31-34	Please add “within the scope of the Exploitation Regulations” in the line 31 after “to provide”. Please delete “which is generally applicable to numerous parts of the Exploitation Regulations”.
1	60 62	Please replace “should” with “aim at reducing...”. Please replace “and should” with “and to that end”
4	172- 181	Please indicate stakeholders (lines 172-181) as follows: “- Sponsoring State(s); - Organs of the Authority (Council, Legal and Technical Commission, Assembly, Secretariat); - Member States; - Other relevant ISA Contractors; - Other relevant stakeholders, where appropriate.”
6	207	Please delete “regional or local”, so that it reads as “... whether international or national”.
6	208	Please replace the wording with “perceptions and values of the project”
7	265	Please replace “and other user of the Area” with “and other activities”
13	459	In case of low risk recovery is possible; in case of considerable and large – recovery is possible in long-term perspective (> 1000 years). This looks strange: what is between recovery now (in nearest years) and 1000 years? Why 1000 years? Etc. Please, clarify this.
19	711	Please replace “including” with “particularly”
21	778	Please delete “as reflected in principle 15 of the Rio Declaration on Environment and Development”
23-24	811- 835, 849- 855,	Please delete all references other than documents of relevant international organisations, such as ISA and ISO, as well as useful links to all sites other than sites of relevant international organisations of global nature (ISA, ISO).

	858- 866, 869
