We support the amendments inserted by the Facilitator, if not indicated otherwise. In addition, we propose a few amendments, also in tracked changes. We suggest deletion of the reference to DR 57 as this does not exist in the current draft. As stated during the meeting, we regard public consultation as important, not least because the Closure Plan will be developed decades after the start of mining when scientific knowledge will have significantly improved and attitudes and public expectations may have shifted. The procedural aspects for this consultation should be included in the regulations (and not in the standard), as for the EIA. In Para 8 we suggest to include a decision on the EPG – this would need to be harmonized with DR 26.
