Regarding Draft Regulation 74 paragraph 1, Germany would like to propose the addition of a new subparagraph 1 e). The purpose of the paragraph is to ensure that the Authority is appropriately informed, to the degree possible, of each sale, shipment, transfer, exchange or other disposal beyond the Mining Area so that it can ascertain that the same standards, including environmental standards are deployed throughout the value chain. Contractors will in any case be keen to collect such information so as to ensure that they can report appropriately on the Scope 3 emissions, amongst other issues, of each sale, shipment, transfer, exchange or other disposal. Making such information available to the Authority will help transparency and assist in the assessment of future Plans of Work.
