

## **ISA 29th Session, Part II – Reading of the Draft Consolidated Text**

### Oral Statement by the Federal Republic of Germany

Delivered in July 2024

#### **Regulation 92 - Seabed Mining Register**

Germany just has a brief comment to make here. We find DR 92 to be an important provision for purposes of transparency and accountability. It is important to ensure that this list in para 1 is revisited at a later stage to ensure that all important items and documentations covered throughout the regulations are duly inserted here. Finally, we believe that a new sub-para (q) should be inserted, as follows: *“any other details as may be directed by the organs of the Authority from time to time”*.
